

HyClone® Announces New Powdertainer™ Powder Feed Bags for Powder Handling Applications

Logan, Utah – March 8, 2005 – HyClone announces the latest innovation in HyClone BioProcess Container™ (BPC™) Systems: Powdertainer™ Powder Feed Bags.

Powdertainer Powder Feed Bags are easy-to-use, closed systems for handling powder material. Available in 1, 5 and 25 kg sizes, these bags feature an integrated handle and a three-inch port for filling and dispensing powders. The port allows for tri-clamp connection to a hydration vessel. An integrated wash down line facilitates complete powder evacuation. Powdertainer bags are manufactured of HyClone's proprietary 9 mil film, HyQ® CX3-9, that is animal derived component free (ADCF™) and passes USP Class VI testing of product contact surfaces. Product is supplied ready to use in two outer layers.
