**Thermo Fisher Scientific Launches Versatile Media for HEK 293 Cell Line**

LOGAN, Utah, (May 7, 2007) — Thermo Fisher Scientific, the world leader in serving science, has developed two new versatile media for HEK 293 cells, adding to the HyClone product line.

The Thermo Scientific HyClone CDM4HEK293™ is chemically defined and contains no animal-derived components. It supports the growth of HEK 293 cultures and promotes adenovirus and recombinant protein production. Thermo Scientific HyClone SFM4Transfx-293™ is designed to support the growth of HEK 293 cultures and promote transfection using lipofection or similar methods.

HyClone SFM4Transfx-293™ and HyClone CDM4HEK293™ are regulatory-friendly media developed through Metabolic Pathway Design™. Both are available as a liquid formulation, and can be packaged in small-volume bottles or in the HyClone line of large-scale BioProcess Container™ systems. They are also available in dry powdered formulation for on-site hydration in the unique HyClone Single-Use Mixer or in existing media formulation facilities.

The HyClone product line includes serum-free media for the biopharmaceutical and research markets designed for many key cell lines, including: Chinese hamster ovary (CHO), hybridomas and myelomas, HEK 293, PER.C6™ (CruCell NV), insect and viral vaccine (e.g., Vero, MDCK).

**About Thermo Fisher Scientific**

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, enabling our customers to make the world healthier, cleaner and safer. With an annual revenue rate of more than \$9 billion, we employ 30,000 people and serve over 350,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings. Serving customers through two premier brands, Thermo Scientific and Fisher Scientific, we help solve analytical challenges from routine testing to complex research and discovery. Thermo Scientific offers customers a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory equipment, chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
